“Necessity, who is the mother of invention (Plato).”

Education

UNIPI(University of Pisa)

MASTER OF ARTIFICIAL INTELLIGENCE AND DATA ENGINEERING

Pise, Italy

Mar. 2025 - Present

Sorbonne University

LICENSE L3 IN COMPUTER SCIENCE

Paris, France

Sept. 2021 - July 2022

- I worked on a doctoral thesis on “Modular Decomposition of Graphs: Algorithmic Aspects and Implementation in Rust”.

UNIPI(University of Pisa)

BACHELOR IN COMPUTER SCIENCE

Pise, Italy

2018 - 2022

Skills

AI/Data-Engineering

Machine Learning, Scikit-learn, Hadoop, Spark

DevOps

AWS, Docker, Linux, Kubernetes, Git, Prometheus, Grafana

Back-end

TomCat, Spring Boot, Django, Flask, REST API, Lambda, Microservices

Front-end

Redux, React, HTML5

Programming

C, Python, JAVA, Rust, Erlang, OCaml, TypeScript, LaTeX

Databases

MySQL, MongoDB, Redis, DynamoDB, Neo4J

Languages

French (native), English, Italian

Experience

Newton, Iperdesign Srl

SOFTWARE ENGINEER

Rome, Italy

Sept. 2022 - Present

- Analysis of customer needs and participation in defining the technical and functional specifications of projects.
- Design and development of web and mobile applications according to customer requirements.
- Designing modular, scalable, and secure software architectures for our applications
- Design, development, and management of relational and non-relational databases for our applications
- Integration of third-party APIs and external services into developed software solutions.
- Integration and use of cloud services for our applications.
- Corrective and evolutionary maintenance of existing software.
- Writing technical documentation and implementing best practices in development.
- Optimize application performance and security.
- Collaborate with design and project management teams to ensure consistency between the user interface, customer experience, and application logic
- Participate in technical reviews and progress meetings with clients and the internal team.

Sorbonne University

COMPUTER PROGRAMMER (DOCTORAL THESIS PROJECT)

Paris, France

Feb. 2022 - Jul. 2022

- Complete conversion and rewriting of scientific code originally written in Python to Rust, with improved performance and memory management.
- Collaboration with researchers and doctoral students to integrate the Rust version into the thesis framework.
- Setting up a testing and benchmarking environment.
